

JOWEL ISLAM HABIB

Full Stack Developer

Phone: +8801990018688 | Email: itshabib.me@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full Stack Developer with professional web development experience delivering production websites and hands-on experience building modern full-stack applications using React, Next.js, Node.js, Express.js, MongoDB, and TypeScript. Built applications featuring REST APIs, authentication, role-based access, Stripe payments, AI-powered functionality, and administrative dashboards. Completed 45 WordPress projects for 34 clients and managed production Linux infrastructure, combining software development with real-world experience in client requirements, deployment, troubleshooting, and production support.

SKILLS

Frontend Development: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, Prisma ORM, REST APIs, JWT, Better Auth

Tools & Workflow: Git, GitHub, Postman, VS Code, npm, Figma

Supporting Technologies: Linux, OpenLiteSpeed, CyberPanel, cPanel / WHM, WordPress, Shopify, XenForo

EXPERIENCE

Web Developer & Linux Systems Administrator — Comallies LLC

Remote: Riyadh, Saudi Arabia (Nov 2022 – Jun 2026)

- Architected and built the agency's corporate website using WordPress, customizing themes and plugins to align with PR lead-generation goals.
- Solely provisioned, secured, and maintained the production Linux VPS (OpenLiteSpeed/CyberPanel), handling firewall configurations, SSL, performance caching, and 99.9% uptime.
- Acted as the agency's technical arm: built, modified, and delivered 15+ client websites (WordPress/CMS) on behalf of the PR firm, managing end-to-end scoping, development, and client handoff.

PROJECTS

GestorFitness — Fitness & Gym Management Platform | [Live](#) - [Frontend](#) - [Backend](#) - [Video](#)

Technologies: Next.js, Express.js, MongoDB, BetterAuth, JWT

- Users can discover and filter fitness classes, book sessions, save favorites, make Stripe payments, and manage bookings from a personalized dashboard.
- Developed REST APIs with Express.js and MongoDB, implementing authentication and role-based access for users, trainers, and administrators.
- Built trainer/class approval, user moderation, transaction monitoring, and platform analytics features for administrators.

AreaAlert — Community Utility Outage Platform | [Live](#) - [Frontend](#) - [Backend](#) - [Video](#)

Technologies: Next.js, Express.js, MongoDB, BetterAuth, JWT, TypeScript, Gemini API

- Users can report electricity, water, internet, and other utility outages and discover community reports by location and category.
- Developed REST API workflows for creating, updating, managing, and browsing outage reports using Express.js and MongoDB.
- Designed a responsive interface focused on making local outage information easy to report, browse, and understand.

IdeaDen — AI-powered project idea & blog content generator | [Live](#) - [Frontend](#) - [Backend](#) - [Video](#)

Technologies: Next.js, Express.js, MongoDB, BetterAuth, JWT, TypeScript, Gemini API

- Users can generate AI-powered project ideas with problem statements, recommended tech stacks, implementation roadmaps, and personalized suggestions based on their skills and interests.
- Users can generate SEO-focused blog content with different templates, writing tones, and content lengths, while exploring community-generated ideas and articles.
- Integrated Google Gemini API and implemented Free/Pro access, generation quotas, rate limiting, and administrative content monitoring.
